

FONTANA REGIONAL LIBRARY COMPUTER USAGE POLICY

MISSION STATEMENT

The Fontana Regional Library system (Library) provides the public of Jackson, Macon, and Swain counties with excellent service and convenient access to resources for their educational, informational, and recreational needs.

INTRODUCTION

This document constitutes a Library-wide policy for the management of computer data networks and the resources they make available, as well as stand-alone computers that are owned and administered by the Library. The policy reflects the ethical principles of the Library and indicates, in general, what privileges and responsibilities are characteristic of the Library computing environment.

Computers and the Internet enable the Library to provide resources beyond its collection. They allow access to ideas, information and commentary from multiple and global sources. Access to electronic resources is provided free by the Library as part of its mission. Access is provided readily and equitably to users, regardless of race, age or socioeconomic status. The Library believes that the benefits to the community from this access far exceed any disadvantages. By its very nature, the Internet is an unregulated medium. As such, while it offers access to a wealth of material that is personally, professionally and culturally enriching to individuals of all ages, it also enables access to some materials that may be offensive, illegal or inaccurate. The Library cannot control access points that often change rapidly and unpredictably.

INTERNET SAFETY

The Library addresses the following Internet safety issues through its Acceptable Use Agreement, Parental Permission Form, and the use of technology protection measures on library computers:

- Access by minors to inappropriate matter on the Internet and World Wide Web;
- The safety and security of minors when using electronic mail, chat rooms, and other forms of direct electronic communications;
- Unauthorized access, including “hacking,” and other unlawful activities by minors online;
- Unauthorized disclosure, use, and dissemination of personal identification information regarding minors; and
- Measures designed to restrict minors’ access to materials harmful to minors.

Technology Protection Measure

The term “technology protection measure” means a specific technology that blocks or filters Internet access to visual depictions that are:

- Obscene;
- Child pornography;
- Harmful to minors;

as those terms are defined in Section 1703 of title 17, Children’s Internet Protection, United States Code.

CONFIDENTIALITY

The Library will treat data stored on computers as confidential (whether or not that information is protected by the computer operating system). Requests for disclosure of information will be honored only under one of the following conditions:

- when approved by the Regional Director;
- when authorized by the owners of the information;
- when required by local, state or federal law.

Computer users will receive notice of such disclosures when possible. (Viewing of information in the course of normal system maintenance does not constitute disclosure.)

Warning: Users of electronic mail systems should be aware that electronic mail in its present form cannot be secured and is, therefore, extremely vulnerable to unauthorized access and modification.

RESPONSIBILITIES OF USERS

Users of Library computing resources have the following responsibilities:

- Users must sign an Acceptable Use Agreement or an Application for Borrower's Card to use full access Internet stations;
- Users of full access Internet stations must have either a current library card or guest card issued by Fontana Regional Library. Photo identification will be accepted in lieu of the library or guest card. To obtain a card, please refer to the Fontana Regional Library circulation policy.
- As the Library cannot control the content of material accessible electronically, individual users must accept responsibility for information accessed;
- Users are responsible for payment of printing fees incurred;
- Users should be aware of computer viruses and other destructive computer programs, and take steps to avoid being a victim or unwitting distributor of these processes;
- Computer accounts, passwords and other types of authorization that are assigned to individual users should not be shared with others;
- Ultimate responsibility for resolution of problems related to the invasion of the user's privacy or loss of data rests with the user. The Library assumes no liability for loss or damage to the user's data or for any damage or injury arising from invasion of the user's privacy.

Parents and legal guardians responsibility

Parents or legal guardians of minor children (under 18 years of age) are encouraged to provide guidance to their own children. Parents or legal guardians are solely responsible for their child's, and only their child's, use of the Library's electronic resources. Parents and legal guardians must grant permission for their minor children to use the Internet by signing the Fontana Regional Library Application for Borrower's Card or the Acceptable Use Agreement.

Legal use

The public and staff may only use computing resources for legal purposes. Examples of unacceptable purposes include, but are not limited to, the following:

- Harassment of others;
- Libeling or slandering others;
- Destruction of or damage to equipment, software, or data belonging to the Library or others;
- Disruption or unauthorized monitoring of electronic communications;
- Unauthorized copying of copyright-protected material;
- Using any computer for illegal or criminal purposes;
- Using any computer as a staging ground to "crack" or "hack" any computer system.

Ethical use

Computing resources should be used in accordance with the ethical standards of the Library. Examples of unacceptable use (some of which may also have legal consequences) include, but are not limited to, the following:

- Violation of computer system security;
- Unauthorized use of computer accounts or access codes;
- Use of computer communications facilities in ways that unnecessarily impede the computing activities of others (such as randomly initiating interactive electronic communications or e-mail exchanges, overuse of interactive network utilities);
- Violation of software license agreements;
- Violation of network usage policies and regulations;
- Violation of another user's privacy;
- Disruptive use of computers that might be detrimental to library service.

LIBRARY RESPONSIBILITIES

The Library is responsible to provide reliable computer services in a safe and accessible environment. The Library will make reasonable effort to:

- Provide staff assistance to users of Library computing resources;
- Accommodate users with special needs;
- Maintain Library computer equipment in good order;
- Resolve outside vendor problems in a timely manner;
- Partner with parents, teachers and other organizations to meet community needs;
- Administer and enforce this policy fairly and impartially.

LIBRARY COMPUTERS

The Library provides computers for the following activities, at some or all locations:

- Internet Access, including full access and express stations, available with a signed agreement;
- Topic Specific Workstations with access to pre-selected Internet sites and related information on popular subjects;
- Educational and Recreational Games suitable for all ages;
- Office Applications (Word processing, etc.) for enhanced productivity;
- Online access to the Library catalog;
- Computer training seminars and workshops;
- Computer labs for training seminars, workshops and general computer use.

SANCTIONS

Violators of the Computer Usage Policy may lose Library privileges. Staff will be subject to normal disciplinary procedures as well. Violations of the Policy described above for legal and ethical use of computing resources will be dealt with in a serious and appropriate manner. Illegal acts involving Library computing resources may also be subject to prosecution by local, state or federal authorities.

DISCLAIMER

Since the Internet is a global electronic network, there is no state/county control of its users or content. The Internet and its available resources may contain material of a controversial nature. In accordance with current state and federal laws, library computers that connect to the Internet use a technology protection measure to filter and block access to images that are obscene, pornographic, or harmful to minors. Filters are not 100% effective and may not filter images that should be blocked, and conversely, may block images that should not be blocked. In the event a site is wrongly blocked, or conversely, not blocked, library users may request review. Parents of minor children must assume responsibility for their children's use of the Internet through the Library's connection. Parents and children are encouraged to read [Child Safety on the Information Highway](#), reprinted and distributed with permission of the National Center for Missing and Exploited Children.

Library staff cannot control the availability of information links that often change rapidly and unpredictably. Not all sources on the Internet provide accurate, complete or current information. Users need to be adept information consumers, questioning the validity of the information.

The Fontana Regional Library assumes no responsibility for any damages, direct or indirect, arising from use of its WWW Server or from its connections to other Internet services.

This policy is based on and is consistent with the *Library Bill of Rights, Access to Electronic Information, Services, and Networks: An Interpretation of the Library Bill of Rights*, and the *Children's Internet Protection Act*. This policy was originally adopted by the Fontana Regional Library Board on May 14, 1996 and revised by the Library Board on March 14, 2006. The Library reserves the right to modify this policy without notice. Send all comments and questions to Karen Wallace, Fontana Regional Library Director at 33 Fryemont Street, Bryson City, NC 28713 or director@fontanalib.org.

ACCEPTABLE USE AGREEMENT

Time Limits Per Day

Computer use is limited to one hour per session unless no one is waiting. To maximize availability of Library computers for all users, each individual is requested to limit their use to five hours per week.

Express station use is available on a first-come, first-served basis for 20-minute intervals.

Sign-In At Service Area Information Desk

Users are required to sign-in at the Information Desk for use of all Library computers except the online catalog and the topic-specific workstations. You will be given a computer user voucher card. Please return it to the Desk when you are finished.

Users may make appointments in person or on the phone for hour-long sessions; appointments may be made up to one week in advance.

Internet users need to present a current library card or guest card issued by Fontana Regional Library. Photo identification will be accepted in lieu of the library or guest card. To obtain a card, please refer to the Fontana Regional Library circulation policy.

Printing

There is a \$.25 per page charge for printing. Use the Print Preview feature to view before printing.

Saving Files

Save your work on a floppy disk, not the hard drive. Floppy disks must be scanned for viruses at the Information Desk before use. Floppy disks can be purchased for \$1.00 at the Desk.

Computer Use

Please do not use any software program other than the ones the Library has installed.

A maximum of two people may use a computer at a time. For full access Internet, both users must sign the Acceptable Use Agreement.

All minors who use full access Internet must have their parent's or legal guardian's signature granting permission on the Fontana Regional Library Application for Borrower's Card or the Fontana Regional Library Acceptable Use Agreement.

Help

Please ask the library staff for help if you have any problems accessing the Internet, computer software or printing.

AGREEMENT

I understand that there is detailed information in the *Fontana Regional Library Computer Usage Policy* on **Confidentiality**, **User Responsibilities** (including **Ethical**, **Legal** and **Parental** responsibilities), a **Disclaimer** about information on the Internet, and possible **Sanctions** when users violate the *Policy*. I agree to comply with the stated rules of the *Policy*.

PRINT NAME _____ DATE _____ GUEST []

SIGNATURE _____ Staff initials _____

PARENT'S SIGNATURE FOR MINORS _____

- I give my child permission to use the Internet at the Library
- I do NOT give my child permission to use the Internet unless accompanied by an adult

Library Bill of Rights

The American Library Association affirms that all libraries are forums for information and ideas, and that the following basic policies should guide their services.

- I. Books and other library resources should be provided for the interest, information, and enlightenment of all people of the community the library serves. Materials should not be excluded because of the origin, background, or views of those contributing to their creation.
- II. Libraries should provide materials and information presenting all points of view on current and historical issues. Materials should not be proscribed or removed because of partisan or doctrinal disapproval.
- III. Libraries should challenge censorship in the fulfillment of their responsibility to provide information and enlightenment.
- IV. Libraries should cooperate with all persons and groups concerned with resisting abridgment of free expression and free access to ideas.
- V. A person's right to use a library should not be denied or abridged because of origin, age, background, or views.
- VI. Libraries which make exhibit spaces and meeting rooms available to the public they serve should make such facilities available on an equitable bases, regardless of the beliefs or affiliations of individuals or groups requesting their use.

Adopted June 18, 1948.

Amended February 2, 1961, and January 23, 1980,
inclusion of "age" reaffirmed January 23, 1996, by the ALA Council.

Access to Electronic Information, Services, and Networks: an Interpretation of the LIBRARY BILL OF RIGHTS

INTRODUCTION

The world is in the midst of an electronic communications revolution. Based on its constitutional, ethical, and historical heritage, American librarianship is uniquely positioned to address the broad range of information issues being raised in this revolution. In particular, librarians address intellectual freedom from a strong ethical base and an abiding commitment to the preservation of the individual's rights.

Freedom of expression is an inalienable human right and the foundation for self-government. Freedom of expression encompasses the freedom of speech and the corollary right to receive information. These rights extend to minors as well as adults. Libraries and librarians exist to facilitate the exercise of these rights by selecting, producing, providing access to, identifying, retrieving, organizing, providing instruction in the use of, and preserving recorded expression regardless of the format or technology.

The American Library Association expresses these basic principles of librarianship in its *Code of Ethics* and in the *Library Bill of Rights* and its Interpretations. These serve to guide librarians and library governing bodies in addressing issues of intellectual freedom that arise when the library provides access to electronic information, services, and networks.

Issues arising from the still-developing technology of computer-mediated information generation, distribution, and retrieval need to be approached and regularly reviewed from a context of constitutional principles and ALA policies so that fundamental and traditional tenets of librarianship are not swept away.

Electronic information flows across boundaries and barriers despite attempts by individuals, governments, and private entities to channel or control it. Even so, many people, for reasons of technology, infrastructure, or socio-economic status do not have access to electronic information. In making decisions about how to offer access to electronic information, each library should consider its mission, goals, objectives, cooperative agreements, and the needs of the entire community it serves.

The Rights of Users

All library system and network policies, procedures or regulations relating to electronic resources and services should be scrutinized for potential violation of user rights. User policies should be developed according to the policies and guidelines established by the American Library Association, including Guidelines for the Development and Implementation of Policies, Regulations and Procedures Affecting Access to Library Materials, Services and Facilities.
